Olzhas Azirali

has successfully completed the online Specialization

Cybersecurity Analyst

This is to certify that the learner has successfully completed the Cybersecurity Analyst Specialization and has demonstrated the ability to detect and analyze cyber threats, perform ethical hacking and vulnerability assessments, manage remediation programs, and execute structured incident response workflows. The learner is proficient in applying SIEM-based monitoring, forensic investigation techniques, containment and mitigation strategies, and AI-driven security operations to protect enterprise environments. Graduates of this specialization are equipped with practical, industry-aligned skills to operate effectively in SOC, blue team, and cybersecurity analyst roles, while also implementing secure AI governance practices.
