EDUCBA

Olzhas Azirali

has successfully completed the online Specialization

Unity Game Development Foundations & 2D Projects

The Unity Game Development Foundations & 2D Projects Specialization equips learners with the skills to design, script, and build interactive 2D games using Unity. Through four project-based courses, you'll master game mechanics, physics simulations, animations, collision detection, AI navigation, and UI integration. Whether you're a beginner or an aspiring developer, you'll gain practical, portfolio-ready experience by creating fully functional games such as Breakout, Gem Collector, and more. By completing this program, you'll be prepared to bring your own game ideas to life and take the first steps toward a career in game development.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
